

OPENCART 2.3.X SHOPPING CART INSTALLATION GUIDE

Mandatory requirements:

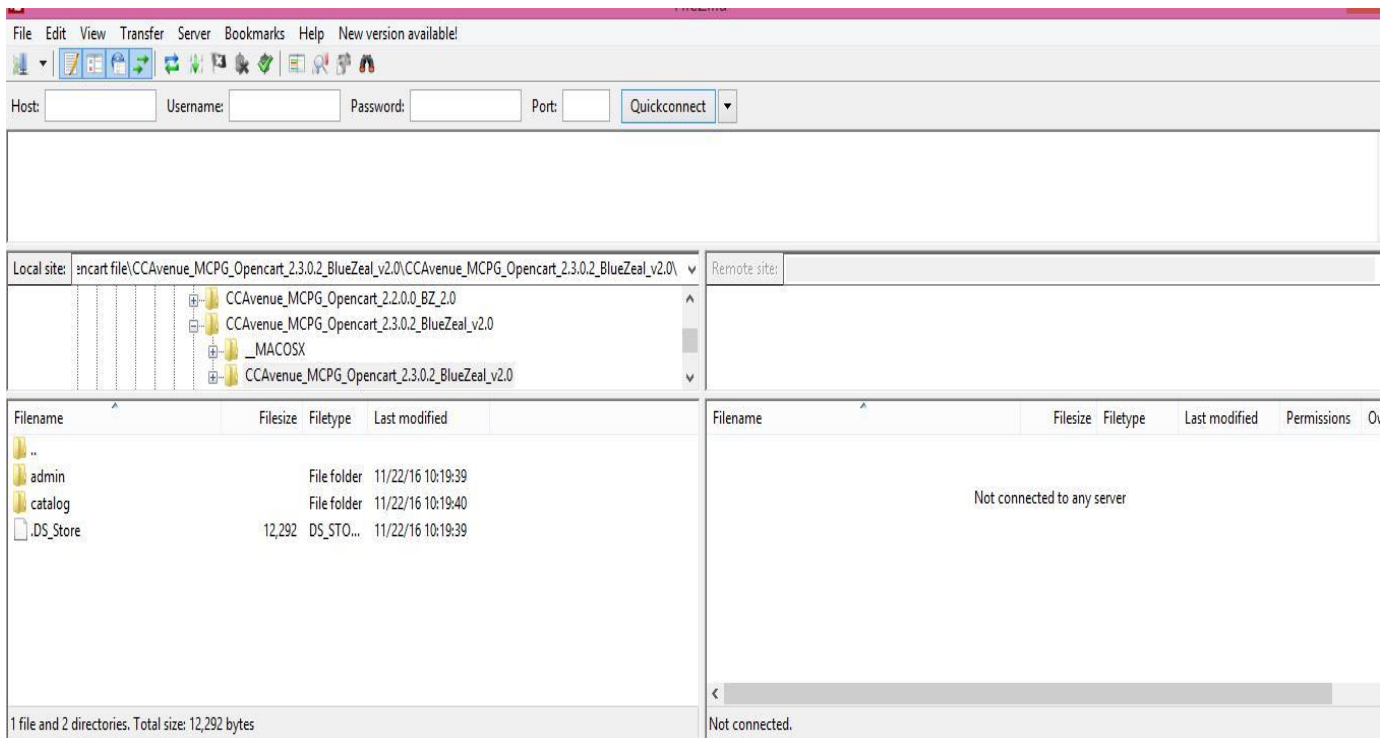

- PHP version 5.6+
- cURL
- OpenSSL
- Internet (Installation cannot be done without the Internet)
- Opencart 2.3.x
- Installation can be done only through Cpanel/FTP
- Lamp server is compulsory to install the module
- This module does not support one-page checkout template.

Module Installation process:

Step 1: Install Opencart's latest version 2.3.0.2 on your server.

Step 2: Unzip the “Opencart2-3-x_ccavenue.zip”

Step 3: Upload the ‘admin’ & ‘catalog’ folder into your Opencart root directory through FTP client.

Step 4: You can use FTP client; (it is available for free) and you can download it by using this link <http://filezilla-project.org/download.php?type=client> or you can use any other FTP client.

Step 5: If the frontend template is different, then please upload ccavenuepay.tpl & ccavenuepay_response.tpl from
 /catalog/view/theme/default/template/extension/payment/
 to your installed theme
 /catalog/view/theme/<themenam>/template/extension/payment/

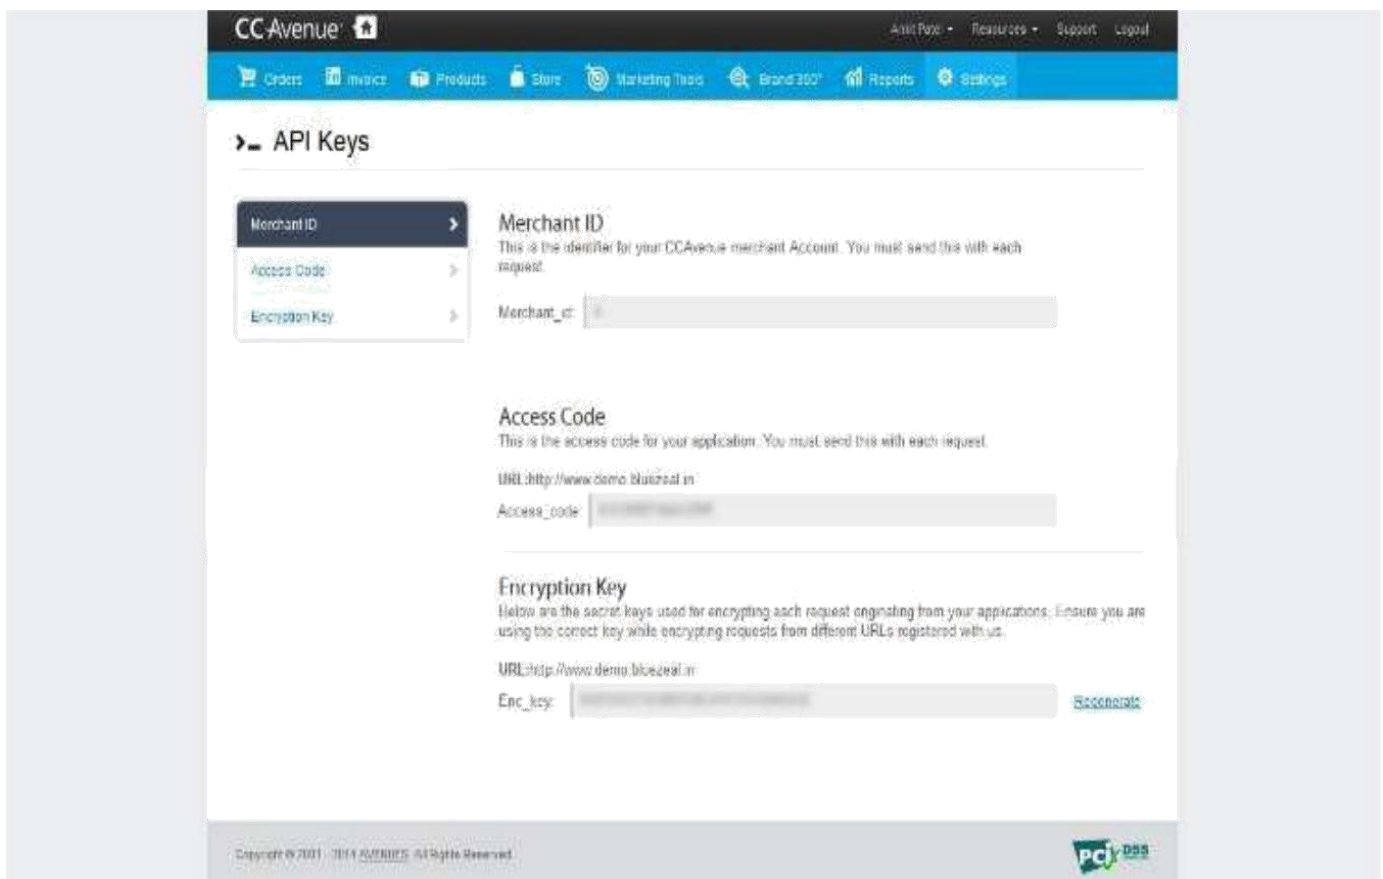

Step 6: Now, go to your Opencart store admin using your ID and Password, click on the Extensions option and select the Payments option.

Step 7: Now install the CCAvenue module.

CCAvenue MCPG	CCAvenue®	Disabled
